

SKATE X

UNMATCHED STABILITY. ADAPTIVE POWER. PURE SPEED.

The PRO Skate-X BOA is built for skiers who demand speed, precision, and total confidence in every stride. It delivers powerful power transfer with exceptional stability, creating a fast, responsive feel that supports a strong skate stride. The fit adapts precisely to your foot for secure support and lasting comfort, allowing natural movement without loss of control.

THE NEW BENCHMARK IN XC PERFORMANCE

BOA® FIT SYSTEM WITH LI2

Dynamic micro-adjustment

BOA® PERFORMFIT™ WRAP

Secure midfoot wrap and heel lock

PA-X CUFF

Lightweight strength and precision

PA-X-SKATE X HEEL COUNTER

ADAPTIVE midsole

Size-specific flex and balance

FREE HEEL

Optimal comfort and performance on all terrains

PRO SKATE X OUTSOLE

Power delivered with superb precision

PRO GAITER

Eco-smart protection with precision fit

ECO-FRIENDLY

Made from recycled polyester & TPU

ULTRA LIGHT

Enabling speed, agility & efficiency

VOLUME CONTROL PLATE

Personalized volume adjustment

ORTHOLITE insole

Advanced thermal insulation

made in EUROPE

ENGINEERED FOR ATHLETES WHO WANT THE FUTURE OF SKATING, NOW.

The collaboration with BOA® and Rottefella brings a new level of precision and performance to cross-country skiing. We have developed a fit and control system designed for athletes who demand uncompromising speed.

Alpinia is the first brand to deliver a non-carbon platform solution fully aligned with the new Skate-X. This required a completely new last and tooling, giving us a clear advantage in next-generation boot design.

Alpinia's R&D created Adaptive-Flex, tailoring flex behavior with specialized midsoles and plates across sizes and techniques. The result is race-ready responsiveness, stability, and comfort—engineered for the future of cross-country skiing.

RACE-READY RESPONSIVENESS

The Alpinia SPARK Junior 7,5 is built to make every run fun and easy for young skiers. Featuring U-Flex technology and a lightweight Synflex core, it offers superior flexibility and effortless turn initiation for fast skill development. The Early Rise Rocker profile enhances stability and control, while the Full Power Cap construction ensures durability without extra weight. Reinforced with fiberglass for added strength and paired with EL 7.5 GW JrS bindings on the Junior Shift system, the SPARK delivers confidence and smooth performance on every slope.
